PVC Ball Valve Attributes

Easy to Turn on-off

Acid and alkali resistant

Commonly used in agriculture, irrigation system, industrial or drainage systems and can be fitted with a water pump

Made from high quality materials that will not contaminate water as we are concerned of the safety of our consumers

Every piece has passed the quality check according to standard

Variety Applications

PVC Ball Valve

4 series (LK, AC, MT, TF) to meet different customers need.

Butterfly

Effectively control and adjust water flow through pipeline. Use for industrial, irrigation and agricultural applications as well as the chemical industry. It has great resistance towards oil and acidity. Use in conjunction with Flange.

Flange

Suitable for chemical and waterway pipeline system. Use in conjunction with Butterfly.

Coupling

Allows convenient future disconnection of pipes for maintenance with high quality o-ring seal. Able to connect two pipes without using glue.

True Union

Well suited for industrial, agricultural and irrigation usages as well as chemical industry. It has great resistance to oil and acid.

Union

Connects two pipes together without the use of glue. Suitable for all kinds of plumbing applications.

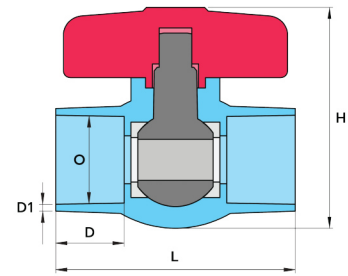

Ball Valve T.F. Extra

Model : TF-900 Series

Type : Socket, Threaded

Color : Blue, Gray, White
